This HC-synthesis motor oil was specially developed to meet the Opel specification OV0401547. The extremely low viscosity grade of this lubricant enables the latest engines to achieve their specified fuel economy targets. In addition, the engine oil forms a strong protective film that absorbs harmful particles, keeping the engine clean and protected. Suitable for a range of modern diesel and gasoline engines in passenger cars and light trucks, whether equipped with an exhaust aftertreatment system or not. Furthermore, it can be used with the latest types of fuel, such as biofuels and ethanol-based fuels. The API SN Plus specification indicates the lubricant's compatibility with highly fuel-efficient GDI engines, where the oil prevents LSPI from damaging engine components.

Note: The operating instructions of the vehicle and engine manufacturers must be followed., **20-liter canister**
